Basics of frequency therapy

Grundlagen der Frequenztherapie

Since the early 20th century there have been scientists and doctors who have the idea Healed diseases without medication. You assume that everyone Disease can be caused by certain viruses, bacteria and the like. In 1930, Mr. Sir Royal Rife was one of the first to do this. He took approx. 20,000 different samples of cancer patients and found that a pathogen in every rehearsal was found. After Rife, Ms. Dr. Clark in the field, and on yours Research results built Mr. Robert C. Beck and developed his own views for Frequency therapy.

Frequenztherapie.

Each of the researchers has developed and used their own device for frequency therapy Different frequencies, as well as tensions and currents for treatment. All therapies have one thing in common, there will be a tension with a certain frequency on Body created. The connection to the body becomes either by leading handles or Bands that can be attached to the arms or legs ensured.

Bänder, die an Armen oder Beinen befestigt werden können, sichergestellt.

The physical basis of all therapy devices © Zappert is that you work with a rectangular frequency signal. This can be broken down with the Fourier analysis. To put it, it means that each rectangular signal made of a variety of high -frequency Signals exists. So that not only parasites that the basic frequency said, for example 30kHz are stunned or killed, but also parasites that appeal to a higher frequency. To find more details in the Kaiptel “Fourier analysis”

Weitere Details hierzufinden sie im Kaiptel “Fourier-Analyse”

The differences in Mr. Rife, Mr. Beck and Dr. Clark to explain, will explained to you below, as far as I know.

Raymond Royal Rife
Raymond Royal Rife

history
Historie

Royal Raymond Rife is considered the forefather of modern frequency therapy. He discovered that everyone Illness has its own electrical signature, which can be modified in such a way that almost All ailments known to humans can be eliminated.
alle dem Menschen bekannten Gebrechen beseitigt werden können.

In 1934 the University of California commissioned a research committee of doctors who Frequency therapy according to RIFE to check their effectiveness. For the studies, 16 patients were The cancer in the final stage had treated. After three months with the treatment to Rife, the patients were examined again. At 14 of them, no more cancer could be found become. The remaining two sick patients were able to use slightly changed therapy can be completely healed within the next 4 weeks. Many came on November 20, 1931 Doctors of the research committee on a banket in Dr. Milbank Johnson's estate together to to talk about the Rife method. The Dr. Milbank Johnson of it reported that he had applied the therapy method according to Rife for ten years and successes in the Treatment of cancer patients. The results of the study and experiences worried the pharmaceutical industry. This made Mr. Rife an offer to the rights to his To buy healing methods. Rife excluded this. Now it came as it had to come. In year In 1939 almost all doctors of the research committee contested that his method is effective. Dr. Milbank Johnson was supposedly poisoned, and the documents by fires, vandalism destroyed. Other people among them also Rife (+1971) died in the following years Fires and poisoning. It was issued that the treatment method according to Rife, punished could no longer be used. This is how it has been forgotten over the years.
nicht mehr angewandt werden durfte. So geriet diese im laufe der Jahre in Vergessenheit.

Treatment method
Behandlungsmethode

Every parasite (bacteria, virus, parasite) oscillates in its very own frequency pattern. As a result Every parasite also has an individual electromagnetic signature. This pattern is not like anyone other organism, or because some other species. Rife isolated after decades of Research the patterns, modified them and used them against the parasites that create them Had! This can be compared to the resonance frequency of a wine glass. When the wine glass is sonicated with its specific resonance frequency, it breaks. Destroy rifes as well Frequencies only pathogens with exactly the same oscillation pattern (frequency). Notes on therapy according to Rife state that it should be treated with weak stimuli. This means that the voltage of the device is based on experience at +9V, and the electricity should not be too strong. Also be careful to treat max. 3-5 minutes per frequency And not too many frequencies. The maximum number of treatments per week is 3 times. During the treatment, the patient should drink a lot of water to wash out the parasites. It should also be mentioned that the treatment success with a voltage of +6V Low failure at 9V, and the upper limit is +12V.
geringer ausfallen aus bei 9V, und die Obergrenze bei +12V liegt.

Dr. Hulda Clark
Dr. Hulda Clark

history
Historie

Ms. Clark developed the so -called zapper with her son. One of the first handy Devices for the treatment of diseases. The frequency therapy was made public again by Dr. Clark. It was with the help too Her son, who is the first to have a building instruction for every interested hobby electronics technician in her Book offered. This made it possible for everyone to have a frequency therapy device itself to build.

nachzubauen.

Treatment method Zapper ©
Behandlungsmethode Zapper ©

The basic principle of treatment according to Dr. Clark is the same as from Rife. With the help of a device, With Dr. Clark is the zapper that the individual electromagnetic signatures of the parasites Provided that they are killed or stunned. Ms. Dr. Clark has in the course of her research Frequency therapy researched further frequencies. Since the tensions and currents of the methods According to Dr. Clark and Rife are approximately the same after my research, these two complement each other So treatment methods.

Behandlungsmethoden also.

The synchrometer (TM)
Das Synchrometer (TM)

Ms. Dr. Clark continued to invent the synchrometer ™. This serves the patient To find pollutants in certain products or the human body. The The basic principle of the synchrometer is also based on resonance. A sample is on a plate of the pollutant placed. Now there are two methods. On a second plate, the product to be measured, which possibly contained this pollutant, placed. If the pollutant in the one to be measured Product is available, there is a response from the two samples. From the built -in The loudspeaker then sounds a sound, which serves as evidence that the pollutant in the product is present is. You can imagine that as if you are taking a duct with two instead of the rehearsals Has weighted. If the two weights (the pollutant) are equally heavy then the scale is In balance and the pointer is exactly in the middle. Alternatively, a person instead of a sample to be measured can also be on the synchrometer Connect. In this case, the second plate remains empty and man takes contacts in the Hands. The result is the same. If there is the pollutant in humans, it comes A signal sounds to the response and the loudspeaker. Ms. Dr. Clark in her book “The Cure for All Diseases ”. If you only need information about the synchrometer, you can also acquire English documentation "synchrometer science laboratory manual". More about this Find research on the Internet. This documentation is very detailed, offers some Construction improvements and information on measurement.

Robert C. Beck
Robert C. Beck

history
History

During his research work, Robert C. Beck used the U.S. Patent 5188738 by Steven Kaali and Peter Schwolsky back and analyzed the work of Dr. Hulda Clark. Build -up He developed this a new form of frequency therapy, the so -called blood electrification. The basis of his therapy is the passage of electricity through the blood and killing of the Disease pathogens with this current. This is in contrast to the therapy according to Rife/ Clark which forms the basic frequency of killing the pathogens. For the blood electrification, he developed a pelvic zapper with half the half Schuhmann frequency and a low electricity works. The main focus here is on Treatment of the blood and the pathogens that are in it. Over time, he changed the Treatment method by also the Magnetic Pulser, as well as preventive colloidal Use silver. The basic statement of his treatment method is that it is more on the Electricity arrives as the frequency. According to his research, it is the parasites that the life expectancy of a person shorten. These consume a large part of the body's nutrients and thus create one Constant cravings. Since Robert C. Beck in his treatment method in addition to the Beckzapper also colloidales Silver uses, it would have to be clarified here whether the colloidal silver alone is not the effect of the Healing caused. I hope that all interested readers have their own attempts over time hire and report about it.

anstellen und darüber berichten.

Treatment method
Behandlungsmethode

The treatment method according to Beck is composed of three parts.
Die Behandlungsmethode nach Beck setzt sich aus drei Teilen zusammen.

The blood electrification with a Beckzapper.
Colloidal silver Magnetic field therapy

Magnetfeldtherapie

On the following page, these 3 areas are explained in detail
Auf der nachfolgenden Seite werden diese 3 Bereiche im Detail erklärt

1.) The blood electrification with a Beckzapper.
1.) Die Blutelektrifizierung mit einem Beckzapper.

This works with half the shoe man frequency (3.92 Hz) and a stream of 50-100 UA. In the first step, the pathogens that are in the blood are killed so that the body can remove them or stun so that the Immune system can kill them. The lower frequency of the Beckzapper explained compared to the Rife/Clarkzapper Robert C. Beck as follows: “The absorption (recording/passage) of the current is higher, if the frequency of the device is lower.

wenn die Frequenz des Gerätes niedriger ist.

2.) Colloidal silver to prevent a secondary infection
2.) Kolloidale Silber zur Vorbeugung einer Sekundärinfektion

Colloidal silver alone is already promised a healing effect (see area Colloidal silver) and is supported to combat the pathogens used. 3.) Magnetic field treatment

3.) Magnetfeldbehandlung

With the Magnetic Pulser, the remaining pathogens are made from the lymph paths with the Blood circulation pushed, where they are from the immune system or another treatment with the Beckzapper can be killed.
Beckzapper abgetötet werden können.

Magnetic papers
Magnetic-Pulser

During his research, Robert C. Beck found that after treatment with the Beckzapper all pathogens in the patient's blood were killed. This patient could But after a few months the same pathogens are detected in the blood. This meant that with the method of blood electrification alone, not all microbes killed or were stunned and they could spread back in the blood. He continued to find out that these would have to come from the lymph node. Therefore he invented a method that a Contraction of the lymphs. This means that the microbes contained in them in them The bloodstreams are pushed, where they can be killed by blood electrification.

die Blutbahnen gedrängt werden, wo sie durch Blutelektrifizierung abgetötet werden können.

Bioresonance therapy
Bioresonanztherapie

history
Historie

In 1977 the doctor Franz Morell and the electrical engineer Erich Rasche developed the basics of today's bioresonance therapy, also known as mora therapy. They assumed that each cell can hand over electromagnetic signals and in turn Create vibrations in the tissue. This means that every person who is from a variety of Cells exist, has its own vibration spectrum. This is made up of healthy Harmonious, as well as pathological disharmonic vibrations.

harmonischen, sowie krankhaften disharmonischen Schwingungen.

Treatment methods
Behandlungsmethoden

Regulation/inverting therapy
Regulations/Inversstherapie

The approach of bioresonance therapy must be recorded this vibration spectrum and in a To guide therapy devices. In the therapy device, the vibration spectrum is broken down into Harmonious and disharmonic vibrations. The disharmonic vibrations are Either filtered out, converted into harmonious vibrations or inverted (to 180 ° rotated). The harmonious vibrations are reinforced. In the end both will Vibration shares brought back together and sent to the body. This will be used supports his self -healing.

seiner Selbstheilung unterstützt.

Transmission therapy
Übertragungstherapie

There is also transmission therapy. Here are on the left and built -in high -performance honeycomb installed. Gemstones, medication can be found in these honeycombs and other substances are brought in. I suspect that the high -performance honeycombs should that increase the energy of the gemstone introduced, medication and to the body should be returned. Whether and how this is done by the device is currently unknown. In the therapy, a magnetic field with variable strength and/or/or Wave swing can be added. Which bioresonance device or method also uses the goal is always the bioenergetic harmony of the body.

wird, das Ziel ist immer die bioenergetische Harmonie der Körpers.

Frequency therapy Signal view
Frequenztherapie Signalbetrachtung

One of the statements of Dr. Clark is the one that can also be combated with a zapper who works with a 30khz right -hand signal, which can also be combated on a different frequency swing. The question arises, why?
schwingen. Da stellt sich die Frage, wieso?

To do this, we have to take a closer look at the rectangle signal from the Zapper ©. This can explain the Fourier analysis to us a mathematical method. With her becomes Calculated as every stretcher signal from an overlay of many sinus signals can be generated can.

kann.

What frequencies do we have?
Welche Frequenzen haben wir?

The individual sine signals that are needed to create a rectangle signal are the odd multiple of the basic frequency.
ungeraden vielfachen der Grundfrequenz.

A rectangular signal with a 30kHz basic frequency consists of the following sine signals:
Ein Rechtecksignal mit 30kHz Grundfrequenz besteht aus folgenden Sinussignalen.

1-fold 3 times 5 times 7 times 9-fold X-times					
1-fache	3-fache	5-fache	7-fache	9-fache	x-fache.....
30khz 90kHz 150kHz 210kHz 270kHz etc.....					
30kHz	90kHz	150kHz	210kHz	270kHz	usw.....

Here is a link to the illustration for a better presentation.
Hier ein Link zur Abbildung für eine bessere Darstellung.

How high must the tension be?
Wie hoch muß die Spannung sein?

In addition to the frequency, the strength of the tension, which is also called amplitude becomes. As can be seen in the illustration, the amplitudes of the sinus frequencies take the multiple of the basic frequency of logarithmic. When we assume that the amplitude of the The basic frequency for our example, (30kHz) 9V is the result.
Grundfrequenz für unser Beispiel, (30kHz) 9V beträgt, ergibt sich daraus folgendes.

1-fold 3 times 5 times 7 times 9-fold X times					
1-fache	3-fache	5-fache	7-fache	9-fache	x-fache
30khz 90kHz 150kHz 210kHz 270kHz					
30kHz	90kHz	150kHz	210kHz	270kHz	.....
9V ~ 5V ~ 3.5V ~ 3V ~ 2V					
9 V	~5 V	~3,5 V	~3 V	~2 V	.....

The specification of the voltage is gross guidelines, because a program for precise calculation missing.
fehlt.

For display also a link with an illustration of the amplitudes:
Zur Darstellung auch hier ein Link mit einer Abbildung bez. der Amplituden.

Resulting considerations for frequency therapy

Resultierende Überlegungen zur Frequenztherapie

If we now know the basic knowledge of the Fourier Analysis on a Zapper © e.g. with 30 kHz Use the following consideration.

anwenden, dann ergibt sich folgende Überlegung.

According to Ms. Clark, the zapper signal should be an amplitude of approximately 9V have. Furthermore, we go to frequency therapy according to Dr. Clark assumes that everyone Parasit has its certain frequency of self -frequency, with which it can be stunned or killed as long as The amplitude of the corresponding frequency is right.

die Amplitude der entsprechenden Frequenz stimmt.

The following results in our example device. The basic frequency of 30kHz with which the device works has the specified amplitude of 9V. If you mathematically disassemble this rectangle signal with the Fourier analysis, this shows this Many signals consist of a higher frequency, but also have a smaller amplitude, As the main signal of the Zapper.

als das Hauptsignal des Zappers.

From the previously shown, it shows, which from 5 times the basic frequency (150kHz) The amplitudes are below 5V, and therefore, according to Ms. Clark, the one is under the amplitude enough to stun or kill the parasites. The question is now that these lower amplitudes are still sufficient to do the pests Approach these higher frequencies to really kill with the zapper?

diese höheren Frequenzen ansprechen, auch wirklich mit dem Zapper zu töten?

I don't guess. This would be at least one reason why there are zapper, in which the frequency can be adjusted or wobbled. Exactly this set or worked out Frequencies have an amplitude that is high enough for the pests specified at the frequency to kill successfully.

erfolgreich zu töten.

Exactly only further medical studies could provide information here. However, since most professional frequency therapy devices have been successful with the There will probably be no work and treat your own frequencies.

Eigenfrequenzen arbeiten und therapieren wird es diese wohl nicht geben.
